

APPROVED FOR PUBLIC RELEASE

Envision achieves CMMC Level 2 Certification from C3PAO

ABERDEEN PROVING GROUND, MD., March 24, 2025 – Envision Innovative Solutions is proud to announce that we have successfully obtained the Cybersecurity Maturity Model Certification (CMMC) Level 2 assessment certification. This significant achievement marks a major milestone in our ongoing commitment to enhancing cybersecurity measures and protecting sensitive information within the defense industrial base.

The CMMC Level 2 certification is a testament to our dedication to securing the cyber environment against potential threats and vulnerabilities. This certification involves stringent requirements and comprehensive assessments, ensuring that we meet the high standards set by the Department of Defense (DoD). By obtaining this certification, Envision Innovative Solutions aligns itself with the DoD's cybersecurity requirements, demonstrating our proactive approach to safeguarding national security interests.

Aligning with Department of Defense Requirements

The defense industrial base plays a crucial role in supporting national defense strategies and operations. As cyber threats continue to evolve, it becomes imperative to ensure that entities within this sector are equipped with robust cybersecurity practices. The CMMC framework, established by the DoD, serves as a critical measure to assess and enhance the cybersecurity posture of defense contractors and suppliers.

Achieving CMMC Level 2 certification signifies that Envision Innovative Solutions has implemented rigorous controls to protect Federal Contract Information (FCI) and Controlled Unclassified Information (CUI). This aligns us with the DoD's efforts to fortify the supply chain and mitigate risks posed by cyber adversaries. Our certification underscores our dedication to maintaining the integrity and confidentiality of vital defense information.

Commitment to Excellence

At Envision Innovative Solutions, we are committed to excellence in all aspects of our business operations. The attainment of the CMMC Level 2 certification is a reflection of our continuous efforts to enhance our cybersecurity capabilities and safeguard our clients' information. We understand the critical importance of cybersecurity in maintaining national security and are proud to contribute to this endeavor.

We extend our gratitude to our dedicated team members who have worked tirelessly to achieve this certification. Their expertise and unwavering commitment have been instrumental in reaching this milestone. As we move forward, we will continue to prioritize cybersecurity and collaborate with our partners to uphold the highest standards of protection.
